

Design of Ecological Field Studies

Homework 3 Due February 19, 2008

1. Complete the generalized paired T test and the Signed Rank test for the artificial BACI data set sent to you in the spreadsheet.
2. Either find an example of use of a replicated or unreplicated BACI design in the literature or suggest one that might be of interest for you to carry out if you had time. (very brief answer –say half page)
