

ST 432 Homework Set 5 Due February 19,2008

Kenneth H. Pollock

Note-Please Show detailed working of problems laid out very legibly so that the grader can see if you know how to do the problems. It is fine to check answers against those in the back but please make sure that you understand the methods and show that you understand the methods by providing detail on the homeworks.

We are now moving into a new topic on the using auxiliary information to improve our estimates of the finite population parameters and Q2 focuses on and illustrates that concept very directly.

1. Q1 P85
2. Q2 P85
