

Homework Set 8 St 432

March 19, 2008. Due March 25

1. Q1 P 139
2. Q2 P139
3. If $m_i = M_i$ then show that equation 1 on page 145 reduces to the i th primary unit total and hence the unbiased estimator in Chapter 13 reduces to the corresponding estimator in Chapter 12.

Homework Set 9 ST 432

March 19, 2008. Due April 1, 2008 (No Fooling (☺))

1. Q1 P154.
2. There will be some other questions on systematic sampling either in this set or the next one. It partly depends on how far I get in lectures as next Tuesday we have a visitor to class.
