

Powerful Techniques for Minimizing Bias Caused by Measurement Error

NEW!

Measurement Error in Nonlinear Models

A Modern Perspective, Second Edition

Raymond J. Carroll

TEXAS A&M UNIVERSITY, COLLEGE STATION, USA

David Ruppert

CORNELL UNIVERSITY, ITHACA, NEW YORK, USA

Leonard A. Stefanski

NORTH CAROLINA STATE UNIVERSITY, RALEIGH, USA

Ciprian M. Crainiceanu

JOHNS HOPKINS UNIVERSITY, BALTIMORE, MARYLAND, USA

A volume in the series Monographs on Statistics and Applied Probability

Series edited by Valerie Isham, Niels Keiding, Thomas Louis, Susan A. Murphy, Richard L. Smith, and Howell Tong

**MORE METHODS, MORE DATA,
MORE ACCESSIBLE THAN EVER**

It's been over a decade since the first edition of *Measurement Error in Nonlinear Models* splashed onto the scene, and research in the field has certainly not cooled in the interim. In fact, quite the opposite has occurred. As a result, **Measurement Error in Nonlinear Models: A Modern Perspective, Second Edition** has been revamped and extensively updated to offer the most comprehensive and up-to-date survey of measurement error models currently available.

What's new in the Second Edition?

- **Greatly expanded** discussion and applications of Bayesian computation via Markov Chain Monte Carlo techniques
- A **new chapter** on longitudinal data and mixed models
- A **thoroughly revised** chapter on nonparametric regression and density estimation
- A **totally new** chapter on semiparametric regression
- Survival analysis **expanded** into its own separate chapter
- **Completely rewritten** chapter on score functions
- **Many more** examples and illustrative graphs
- **Unique data sets** compiled and made available online

In addition, the authors expanded the background material in Appendix A and integrated the technical material from chapter appendices into a new Appendix B for convenient navigation. Regardless of your field, if you're looking for the most extensive discussion and review of measurement error models, then **Measurement Error in Nonlinear Models: A Modern Perspective, Second Edition** is your ideal source.

FEATURES

- Presents a complete and up-to-date survey of the modern measurement error modeling literature, written by leaders in the field
- Provides several case studies and abundant examples along with an index of this material for easy reference
- Offers an extensive set of measurement data available for download from the book's Web site
- Discusses the use of R, Stata®, and WinBUGS® and supplies downloadable computer code

CONTENTS

Introduction	Nonparametric Estimation
Important Concepts	Semiparametric Regression
Linear Regression and Attenuation	Survival Data
Regression Calibration	Response Variable Error
Simulation Extrapolation	Appendix A: Background Material
Instrumental Variables	Appendix B: Technical Details
Score Function Methods	References
Likelihood and Quasilielihood	Applications and Examples
Bayesian Methods	Index
Hypothesis Testing	Index
Longitudinal Data and Mixed Models

A Modern Perspective, Second Edition

Other Titles of Interest

TRANSFORMATION AND WEIGHTING IN REGRESSION

Raymond J. Carroll
TEXAS A&M UNIVERSITY, COLLEGE STATION, USA

David Ruppert
CORNELL UNIVERSITY, ITHACA, NEW YORK, USA

This monograph reviews the major statistical techniques used to analyze regression data with nonconstant variability and skewness. The authors have developed statistical techniques applicable to many problems across a range of disciplines. Their main focus is on data transformation and weighting, but they include ideas from fields such as influence diagnostics, robustness, bootstrapping, nonparametric data smoothing, quasi-likelihood methods, errors-in-variables, and random coefficients.

Catalog no. C1421, 1988, 264 pp.
ISBN: 0-412-01421-1, \$99.95 / £56.99

MEASUREMENT ERROR AND MISCLASSIFICATION IN STATISTICS AND EPIDEMIOLOGY

IMPACTS AND BAYESIAN ADJUSTMENTS

Paul Gustafson
UNIVERSITY OF BRITISH COLUMBIA, VANCOUVER, CANADA

"This book shows that error-prone measurements may create serious biases and offers Bayesian approaches to attempt unbiased estimation, or 'adjustments'. ... This is a useful book if you have data containing errors or if you have an interest in statistical theory of errors of measurement. As nearly all data is in some way erroneous, it is a useful book for all statisticians and mathematically inclined epidemiologists."

—Statistics in Medicine

Catalog no. C3359, 2004, 200 pp.
ISBN: 1-58488-335-9, \$89.95 / £49.99

NONLINEAR MODELS FOR REPEATED MEASUREMENT DATA

Marie Davidian
NORTH CAROLINA STATE UNIVERSITY, RALEIGH, USA

David M. Giltinan
GENETECH, INC., SOUTH SAN FRANCISCO, CALIFORNIA, USA

"...gives a very well-written account of the field over the past few decades, focusing mainly on US work and including much of the authors' own, plus a glimpse of the future. It fairly reflects that literature over the years in dwelling at length on certain computational methods for maximum likelihood estimation. ... enough detail of the methodology is given, together with helpful guidance on available software, to enable the keen novice to try his hand."

—M.J. Crowder, Biometrics

Catalog no. C8341, 1995, 360 pp.
ISBN: 0-412-98341-9, \$84.95 / £48.99

Please use this ORDER FORM, CALL or ORDER ONLINE at WWW.CRCPRESS.COM

Please indicate quantities next to the title(s) ordered below:

MEASUREMENT ERROR IN NONLINEAR MODELS: A MODERN PERSPECTIVE, SECOND EDITION

.....Catalog no. C331X, ISBN: 1-58488-633-1 at \$89.95 / £49.99 each.

Other titles of interest:

TRANSFORMATION AND WEIGHTING IN REGRESSION

.....Catalog no. C1421, ISBN: 0-412-01421-1 at \$99.95 / £56.99 each.

MEASUREMENT ERROR AND MISCLASSIFICATION IN STATISTICS AND EPIDEMIOLOGY: IMPACTS AND BAYESIAN ADJUSTMENTS

.....Catalog no. C3359, ISBN: 1-58488-335-9 at \$89.95 / £49.99 each.

NONLINEAR MODELS FOR REPEATED MEASUREMENT DATA

.....Catalog no. C8341, ISBN: 0-412-98341-9 at \$84.95 / £48.99 each.

Ordering Information: Orders must be prepaid or accompanied by a purchase order. Checks should be made payable to CRC Press. Please add the appropriate shipping and handling charge for each book ordered. All prices are subject to change without notice. If purchasing by credit card please be sure to include the 3 digit security code that appears on the back of your card in the "sec code" field provided below. **U.S./Canada:** All orders must be paid in U.S. dollars. TAX: As required by law, please add applicable state and local taxes on all merchandise delivered to CA, CT, FL, KY, MO, NY, and PA. For Canadian orders, please add GST. We will add tax on all credit card orders. **European Orders:** All orders must be paid in U.K. £. VAT will be added at the rate applicable. **Textbooks:** Special prices for course adopted textbooks may be available for certain titles. To review a book for class adoption, contact our Academic Sales Department or submit your textbook evaluation request online at www.crcpress.com/eval.htm **Satisfaction Guaranteed:** If the book supplied does not meet your expectations, it may be returned to us in a saleable condition within 30 days of receipt for a full refund.
